

NATIONAL MENTORING PROGRAM 2022

The National Group Mentoring Program organised by the Electric Energy Society of Australia (EESA) is a program committed to empowering young and upcoming Engineers to flourish across Australia's Electric Energy industry. As Mentees you will benefit from personal growth and contribute to a culture of positive learning that will support the capability of engineering in the industry today and in the future. This program is an Australia-wide initiative offering space and opportunity for professional development, reflection, challenge, and self-awareness.

Unique to EESA, Mentoring is the opportunity to build networks across several disciplines, government, and private business in Australia's

Electric Energy industry. This program focuses on state-of-art themes for technical mentoring in a Masterclass format. Subject Matter Experts will guide the mentees on a range of topics impacting the Electric Energy industry. Themes include challenges of integrating renewable energy infrastructure, electric vehicles, innovative asset inspection techniques etc. In addition to this, two sessions will be specifically focussed on job application and interview preparation in a dynamic, hybrid work environment.

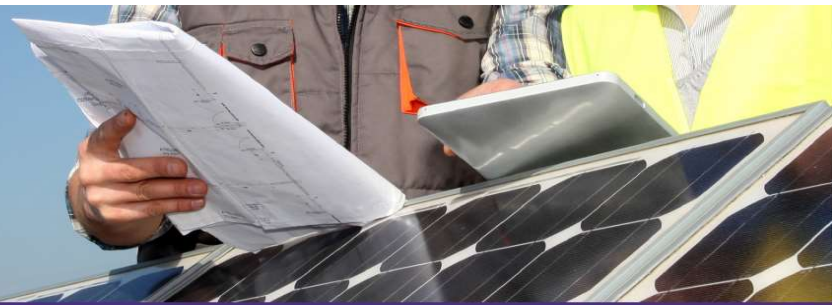

We encourage you to take up this opportunity to not only build your mentor relationships virtually but also expand your network to wider Australia.

Eligibility for Mentees

- Undergraduate Electrical Engineering students
- Postgraduate Electrical Engineering students
- Electrical Engineers with less than 5yrs of Graduate work experience

Benefits for Mentees

- Build professional networks and a support system
- Increase confidence and self-esteem
- Learn from industry leaders, subject matter experts and peers
- Receive support and guidance to achieve career goals and acquire workplace skills and industry knowledge

- Enjoy the space and opportunity for professional reflection, conversation, challenge and learning
- Accumulate CPD points

Participant responsibilities for mentees

- Explore all personal strengths and development needs
- Have a positive attitude and be open to developing self-awareness, personal growth, seeking constructive feedback
- Take responsibility for their decisions and actions
- Be clear about their goals for the mentoring relationship
